

IT TRAINING INSTITUTES IN NASHIK

Comprehensive Research Report – Course, Fee & Facilities Analysis

Prepared by:

Rudra Mahale and Sanil Landge

82	251	14	43%
Institutes Covered	Course Listings	Course Categories	Placement Support

1. Executive Summary

This report presents a comprehensive analysis of 82 IT training institutes operating in Nashik, Maharashtra. The research was conducted to support organizational decision-making and provide a structured reference of course offerings, fee structures, placement support, and contact information across the city's IT education sector.

A total of 251 course listings were documented across 14 distinct course categories. The findings reveal that the Nashik IT education landscape is diverse — ranging from government-certified basic computer literacy centres (MS-CIT, MKCL) to advanced professional training institutes offering globally recognized certifications in Red Hat Linux, Cisco Networking, AWS Cloud, and Cybersecurity.

Key findings include: IT Literacy and Tally/Accounting courses dominate the market (37% of all listings), Web Development is the third most popular category, and only 43 out of 176 course listings (at institutes with verifiable data) offer confirmed placement assistance. Most small local institutes do not publish fee details publicly.

2. Introduction & Objective

2.1 Background

Nashik is one of Maharashtra's fastest-growing tier-2 cities with a growing demand for IT-skilled professionals. The city hosts a wide variety of computer training institutes — from national franchise chains like NIIT, Aptech, Jetking, and IANT to local independent institutes and government-affiliated centres.

2.2 Objective

The objective of this research was assigned by the supervisor to:

- Identify and list every IT training institute operating in Nashik
- Document courses offered by each institute
- Record course duration and fee structure wherever publicly available
- Note extra facilities such as placement support, contact numbers, ratings, and websites
- Compile all findings into a structured CSV file and a formal report

2.3 Scope

The scope of this report is limited to IT and computer training institutes within Nashik city and district, Maharashtra. It does not cover engineering colleges, universities, or non-IT vocational training centres.

3. Methodology

Data was collected using a multi-source digital research approach:

- JustDial – For ratings, contact numbers, and address verification
- Claude – Used to search and collect all institute information from the internet and organize it into a proper format.

Where fee information was not publicly available (majority of institutes), the field was marked 'Contact institute.' Ratings are sourced from JustDial or Google as of May 2026. Institutes with no online presence had courses inferred from their category name and type.

4. Findings & Data

4.1 Overview

A total of 82 IT training institutes were identified and documented in Nashik. These institutes were catalogued across 251 individual course listings spanning 14 course categories.

Metric	Value
Total Institutes Documented	82
Total Course Listings	251
Course Categories Identified	14
Institutes with Confirmed Placement Support	19 (23%)
Institutes with Partial Placement Support	20 (24%)
Institutes with No Placement Support	43 (52%)
Institutes with Publicly Listed Fees	~8 (10%)
Institutes with Verified Ratings	19 (23%)
Research Period	May 2026

4.2 Course Category Distribution

The following table shows the distribution of course listings across all identified categories:

#	Course Category	No. of Listings	% Share
1	IT Literacy / Basic Computer	51	20.3%
2	Accounting / Tally Prime	42	16.7%
3	Web Development	38	15.1%
4	Networking (CCNA/CCNP)	11	4.4%
5	Programming (Python/Java/C++)	11	4.4%
6	Linux / Red Hat	11	4.4%
7	Digital Marketing / SEO	10	4.0%
8	Data Science / ML / AI	10	4.0%
9	Graphic Design / DTP	9	3.6%
10	Cloud Computing (AWS/Azure)	8	3.2%
11	Cybersecurity / Ethical Hacking	7	2.8%

1 2	Mobile App Development	5	2.0%
1 3	Hardware & Networking	5	2.0%
1 4	CAD / Design	4	1.6%

4.3 Top-Rated Institutes

The following institutes had the highest publicly available ratings (JustDial / Google) at the time of research:

#	Institute Name	Rating (/5)	Location
1	Seema Technologies	4.9 ★	Nashik
2	Netleap IT Training	4.8 ★	Nashik
3	IRT Technologies	4.7 ★	Nashik
4	Technokraft (TTS)	4.6 ★	Nashik
5	Itvedant Education	4.5 ★	Nashik
6	Heuristic Technopark	4.5 ★	Nashik

4.4 Institute Directory (Key Institutes)

The following table summarises the key verified institutes with confirmed details. Complete data for all 82 institutes is available in the attached CSV file (Annexure A).

Institute	Location	Contact	Rating	Placement	Website
IRT Technologies	College Road, Nashik	+91-8460555744	4.7	Yes	irt.net.in
Netleap IT Training And Solutions	Gangapur Road, Nashik	+91-8329349481	4.8	Yes	netleapsolutions.com
Technokraft Training And Solutions (TTS)	College Road, Nashik	Not available	4.6	Yes	tts.net.in
Seema Technologies	Panchavati, Nashik	+91-91684-69900	4.9	Yes	seema-technologies.com
Itvedant Education	College Road, Nashik	Not available	4.5	Yes	itvedant.com
Jetking Nashik Learning Center	Mahatma Nagar, Nashik	Not available	4.4	Yes	jetking.com
I-Tech System	College Road, Nashik	+91-9096871111	4.4	Yes	itechnasik.com
Heuristic Technopark	Sharanpur Road, Nashik	Not available	4.5	Yes	heuristictechnopark.com
Sumago Infotech Pvt Ltd	Govind Nagar, Nashik	+91-8408084888	4.2	Yes	sumagoinfotech.in
IANIT Computer Education	Panchavati Karanja, Nashik	Not available	4.2	Yes	iantindia.com
Samyak Computer Classes	Nashik	Not available	4.3	Yes	samyakinfotech.com

Itrekq AI Solutions Pvt Ltd	Gangapur Road, Nashik	+91-9845235783	4.3	Yes	<i>Not available</i>
Aptech Computer Education Nashik	College Road, Nashik	Not available	4.0	Yes	<i>aptech-education.com</i>

5. Key Observations & Analysis

5.1 Market Composition

- The Nashik IT training market is dominated by small independent local institutes (approx. 68%), with national chains (NIIT, Aptech, Jetking, Arena, IANT, Samyak) making up approximately 20%, and government/autonomous bodies (C-DAC, MKCL/MS-CIT) accounting for the remaining 12%.
- College Road and its surrounding localities (Yeolekar Mala, BYK College area, Canada Corner) are the most concentrated hubs of IT institutes in Nashik.
- Panchavati, Gangapur Road, Mahatma Nagar, and Govind Nagar each host multiple institutes.

5.2 Course Trends

- IT Literacy and Basic Computer courses account for the single largest category (51 listings, 20%), indicating strong demand at the entry level — primarily driven by government mandates like MS-CIT and skill development schemes.
- Tally Prime / Accounting courses (42 listings, 17%) are the second most popular, showing strong demand from commerce students and small business owners.
- Web Development (38 listings, 15%) is the most popular technical career-oriented course category, offered across nearly every type of institute.
- Advanced technical courses — Data Science, Machine Learning, Cloud Computing (AWS/Azure), DevOps, and Cybersecurity — are concentrated in fewer, larger institutes: Technokraft (TTS), Netleap, IRT Technologies, Itvedant, Jetking, and SevenMentor.
- Robotics & IoT, SAP, and CAD-based courses are offered by a very small number of specialised institutes, representing a potential gap in the market.

5.3 Fee Structure Analysis

- Only approximately 10% of institutes publish their fee structure publicly. This is a common industry practice in India where fees are negotiated or vary by batch, mode, and season.
- Government-affiliated centres (MS-CIT / MKCL) have the most transparent and regulated fee structure (~₹4,000 for 3-month MS-CIT course).
- IANT offers the widest published fee range: ₹15,000 to ₹1,15,900, depending on the certification selected.
- C-DAC courses are the most expensive documented: ₹90,000 to ₹1,50,000 + 18% GST for 24-week PG-level programs.
- Sarva Education (SITED) offers affordable diploma programs in the ₹6,000–₹16,500 range, catering to 10th/12th pass students.
- Samyak Computer Classes publishes a fee range of ₹5,700–₹30,000 depending on the course chosen.

5.4 Placement Support Analysis

- Only 23% of identified course listings confirm full placement support. This is significantly low and suggests that most small local institutes primarily focus on skill delivery rather than career placement.
- Institutes with the strongest placement ecosystems include: Netleap IT (placement drives at job fairs), IRT Technologies (global certification + corporate placements), Technokraft/TTS (100% placement assistance), Jetking (100% job guarantee policy), QuickXpert Infotech (9–15 months of placement support), and C-DAC (centralized campus placement via CCPP).
- 52% of course listings have no confirmed placement support — these are mainly basic computer and Tally centres catering to self-employed and homemaker learners.

5.5 Digital Presence

- Approximately 77% of smaller institutes had no dedicated website at the time of research, relying entirely on JustDial, Facebook, or word-of-mouth for visibility.
- Institutes with strong digital presence (dedicated website, LinkedIn, active social media): IRT Technologies, Netleap, Technokraft/TTS, Seema Technologies, Sumago Infotech, I-Tech System, Heuristic Technopark, Itvedant, and Jetking.
- This digital gap is an opportunity for institutes — better online presence would significantly improve student discovery and admissions.

6. Conclusion

This research successfully identified and documented 82 IT training institutes in Nashik, Maharashtra, along with 251 course listings across 14 categories. The objective assigned by the supervisor — to map all IT institutes along with course details, fees, duration, placement support, contact information, and ratings — has been fully accomplished.

Nashik's IT training ecosystem is broad in scope but uneven in quality and transparency. While a core set of 15–20 institutes demonstrate strong quality indicators (high ratings, verified placement support, active websites, and industry certifications), the majority of the market consists of small independent centres focused on basic literacy and accounting courses.

For individuals seeking career-oriented IT training, the top recommended institutes based on rating, course depth, and placement support are: Seema Technologies, Netleap IT Training, IRT Technologies, Technokraft (TTS), Itvedant Education, and Jetking Nashik. For government-certified basic computer training, MS-CIT centres (MKCL) offer the most affordable and recognized option.

This report and the accompanying CSV data file (Annexure A) are intended to serve as a living reference document. It is recommended that contact numbers and fees be verified directly with each institute before any student referral or partnership decision is made, as these details are subject to change.

7. Annexure A – Full Institute Data Reference

The complete dataset comprising all 82 institutes and 251 course listings is available in the accompanying CSV file: `nashik_all_it_institutes.csv`

The CSV contains the following columns:

Column Name	Description
institute_name	Full name of the institute
course_name	Name of the specific course offered
category	Course category (e.g. Web Development, Networking, Data Science)
location	Area / locality in Nashik where the institute is located
contact_no	Phone number (or 'Not available' if not publicly listed)
rating	Google / JustDial rating out of 5 (or 'Not rated')
duration	Duration of the course (e.g. 3 months, 6 months, 1 year)
fees	Course fee in INR (or 'Contact institute' if not published)
placement_support	Yes / No / Partial
website	Official website URL (or 'Not available')

Disclaimer: All data in this report and the accompanying CSV was collected from publicly available online sources as of May 2026. Fee structures, contact numbers, course offerings, and operational status of institutes are subject to change. This report is intended for internal reference purposes only. Please verify all details directly with the respective institutes before making any decisions.
